

SPORTSWEAVE

Artificial Grass Cricket Wickets

Our match Wickets and Practice Facilities are suitable for Clubs and Schools and are installed extensively throughout the U.K. by our own experts

SPORTSWEAVE is a woven Wilton carpet of extruded green polypropylene, stabilized against ultra violet and atmospheric degradation. Unaffected by extreme weather conditions, the pitch can be left out all year long.

SPORTSWEAVE has a latex backing allowing porosity and a resistance to water. It is also resistant to chemical, bacteria and insect attack. The surface 'grass' is one of the most dense carpets on the market, making it extremely durable, and with a pile height of approximately 8mm, is proven as ideal and true for cricket at all levels.

SPORTSWEAVE is generally laid onto a hard porous base.

SPORTSWEAVE is available in a range of package installations;

- It can be installed unobtrusively on the end strip of the 'square'
- It can be installed as a practice wicket complete with nets (Whether it be a single bay or several bays)

Whichever way gives you the best opportunity to have a **SPORTSWEAVE** installation we will endeavor to oblige
