Integral weighted tennis posts

Tennis posts Portable outdoor/indoor

- Ideal for synthetic surfaces and sports halls. Supplied in sets, nets are not included.

Integral weighted tennis posts

Revolutionary new tennis post design, encompassing the unique integral weighted roller system. The perfect solution for multi-court facilities. The integrally weighted tennis post allows regulation net height to be achieved. Eliminates the need for a full length bottom bar. Detachable front uprights manufactured from 80mm square by 3mm extruded aluminium. 1.13m wide base frame manufactured from 76mm square x 3mm aluminium. Base has 300mm long front stabilising foot. Unique roller system, 5 separate galvanised steel outer rollers. Each roller contains individual solid steel internal weights. Each roller measures 193mm in diameter. Complete with rubber feet to protect the playing surface. Complete with lock-on synthetic net hooks.

Overall depth of base: 1045mm, depth from front of upright to rear of base: 750mm.

Polyester powder coated green. Heavy duty brass winder and brass pulley wheel.

193kg per set

OSE-T1470

Integral weighted post and base detail

Base pad for integral weighted tennis posts
