

FLEETWOOD COMMUNITY PROJECT Lancashire County Council

THE PROJECT

The new young peoples community centre costing more than £350,000 was officially opened in July 2003. The centre, which includes a multi use games area, was funded as a result of a partnership between Lancashire County Council, Fleetwood Regeneration Partnership and the Fleetwood Community Association.

CONSTRUCTION

G. Thornton (Contracts) Ltd have partnered Lancashire County Council on several projects over many years. The recent project at Milton Street Community Centre included the construction of a floodlit Stadium 25 synthetic grass multi use games area with a 358 rebound weld mesh fencing system. The project also included the construction of a macadam netball/basketball court, a rubber safety play area, cycle track, car park, block paving pathway, garden area and boardwalk. The recreation facilities are on the site of an old school and as part of the project we incorporated the remains of the original school entrance into seating within the garden area.

"The new centre will provide excellent purpose built services for young people in Fleetwood."

Alan Whittaker, Lancashire Cabinet Minister for Education & Young People
