

## BEAULIEU CONVENT SCHOOL

### BACKGROUND

G. Thornton (Contracts) Ltd is an experienced manufacturer and installer of synthetic sports surfaces. We continually provide quality outdoor sports facilities at competitive prices for schools, colleges, universities, local authorities and private sports clubs.

Our extensive portfolio of products includes tennis courts, multi use games areas, synthetic turf pitches for hockey and football, and athletic tracks. Our multi use games areas include open textured macadam, painted open textured macadam, polymeric and sand filled/dressed synthetic grass surfaces.

### THE PROJECT - MULTI USE GAMES AREA

Beaulieu School in Jersey is absolutely delighted with the multi use games area which was installed by G. Thornton (Contracts) Ltd during the summer of 2001. The area which measures 2560 sq m was surfaced with our Premier 10 sand dressed system. The surface construction is unique in that three quarters of the carpet is laid onto an insitu shockpad whilst the remainder is laid directly onto a tarmac surface. This variation in construction allows the facility to be used for a diverse range of sports including hockey, rounders, netball, tennis and athletic training. The project also included the installation of a long jump sand pit.
