

Football Surfaces

The increasing market demand for surfaces that specifically match the playing performance of natural grass has led to the development of new generations of synthetic grass for football.

These surfaces have a much longer pile than the standard range and are partially filled with a rubber and sand mix. These surfaces offer enhanced playing qualities for football.

- **Easy** installation
- **Natural** look and feel
- Best **ball behavior** (ball roll, bounce and speed)
- **Comfortable** to play on
- Excellent **pile anchoring**
- Increased **durability** for a constant playing surface over years
- **Safety** for players: stability, safe moving and turning
- Surfaces meet **specifications** set at amateur and professional levels
